

# City of Konin

The 'Local Development' Program:  
Experiences, Successes, and  
Recommendations from the  
„CITY ENERGY GENERATOR A SOURCE OF  
SUCCESS FOR KONIN”

Warsaw, February 27-28, 2024

## QUESTIONS

1. Tell, what was important for you (your city) when you were preparing the project in 2020?
2. What hopes/expectations did the City have for the project?
3. What changes did it want to make?

## ANSWERS

1. Introducing the City of Konin to a New Path of Development, which is the Green City of Energy.
2. Through the implementation of the project, Konin should become a well-prospering and entrepreneurial city.
3. To introduce a new quality of management in institutional and local development.

Support, involvement of city authorities

Teamwork, procedures (formation of teams/responsibility)

Cooperation within the office as well as between local government units (LGUs), communication, trust

Strategic management, joint implementation of city goals/vision - Green City of Energy

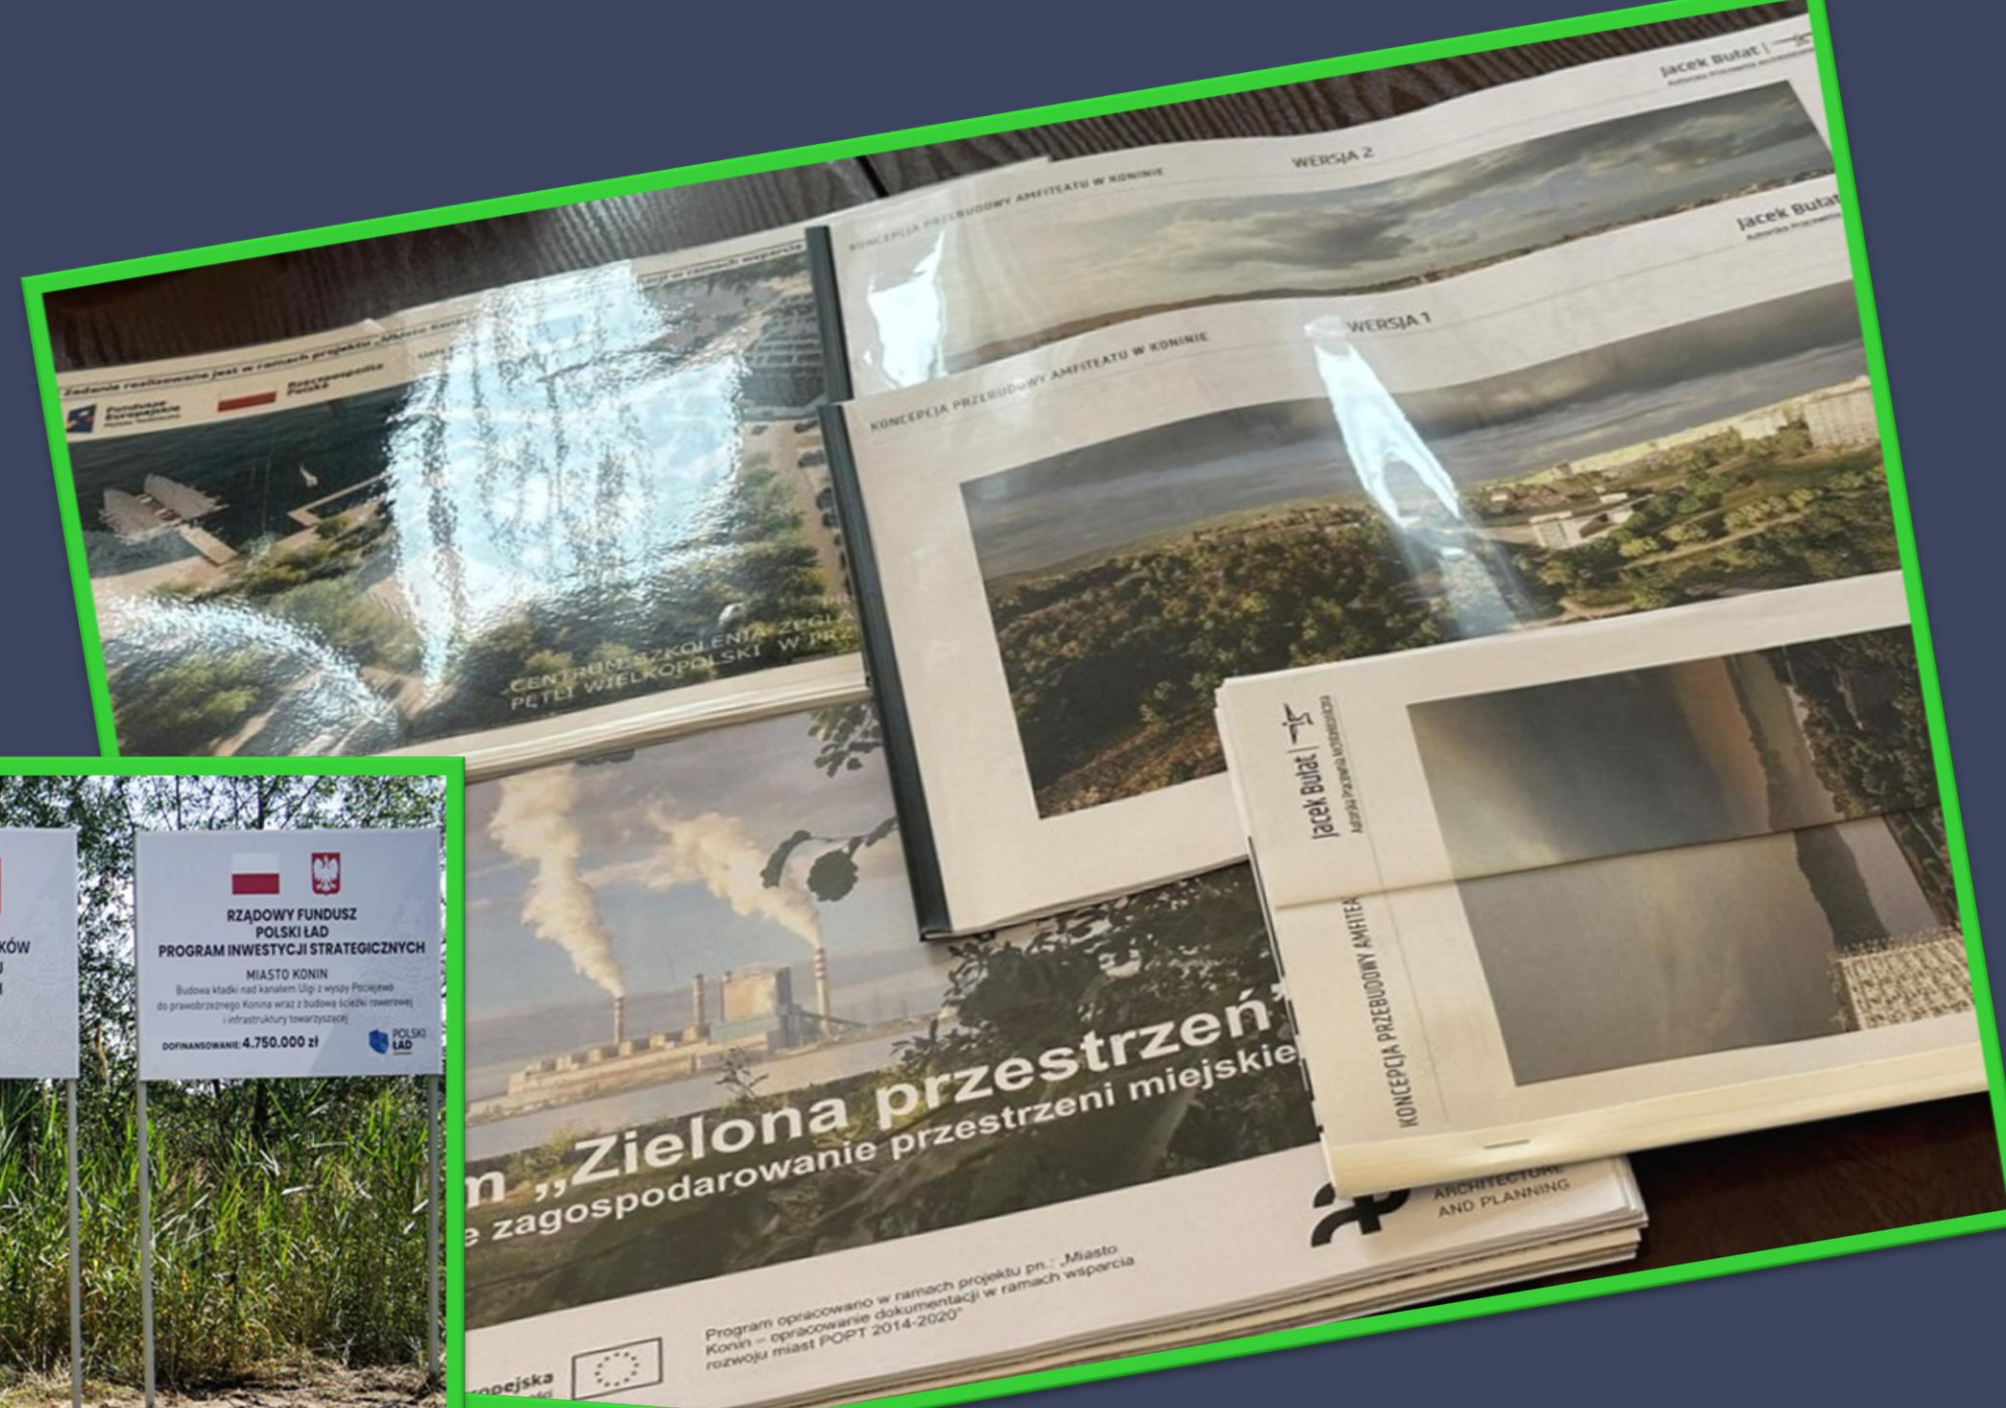

Our  
initial  
results 😊

## FIRST RECOMMENDATIONS

1. Adopt a document specifying a list of key initiatives = **New Path of Development**
2. **Implement strategic management** = teamwork - breaking out of silos, cooperation between departments and units, responding to and mitigating risks
3. Look into the future and prepare documentation necessary for investment implementation in advance = **Smart City Plan, technical documentation**
4. **Financial assembly** = seeking various sources of investment financing (PL, RFIL, EU, FN)
5. Implementation of key investments to achieve environmental, social, and economic goals = **construction of a pedestrian-cycling bridge over the Ulga Canal**
