

City of Konin

Project name: „CITY ENERGY GENERATOR A SOURCE OF SUCCESS FOR KONIN”

By implementing such a project, our aim was to align Konin with the New Path of Development, which is the Green City of Energy, in accordance with the Konin Development Strategy Plan 2020-2030.

Our Achievements

Institutional Development
(Project Teams)

Popraw jakości życia
mieszkańców w Koninie.

Improve the quality of life for
residents of Konin.

A well-prospering and
entrepreneurial city, thanks to
energy transformation,
healthy balance, and
creativity.

The most important initiatives of the project in the field of local development

Comprehensive energy
modernization of 2 municipal
buildings and preparation of
project-cost documentation
for another 4 buildings.

Construction of a footbridge over
the Ulga Canal from Pocijewe
Island to the right bank of Konin,
along with the construction of a
pedestrian-cycling path and
accompanying infrastructure.

The most important initiatives of the project in the field of institutional development

Management of the New Path
of Development.

Implementation of the mMieszkaniec
application with a module for
available urban space.

Development of a Senior
Policy for the City of Konin for
the years 2023-2030.

Integrated information system for
managing Local Government Units
(LGUs) and developing new e-services.

We will assist others and demonstrate how to effectively implement strategic management to achieve set goals and directions of action.
